## ABOUT NIS

National innovative systems is one of the leading companies in doors, windows, Façade, sky lights, frameless glass doors, shower cubical, skylights and internal partitions solutions. Specializing in the design, manufacturing, installation and service of precision made to order Aluminium systems. Our Aluminium Profiles confirms to all quality standards and come with a special formulation for tropical Indian climate which satisfies and ensures high durability to the door windows systems in 6063 T6 grade in both powder coated and anodized finishing available in various colors.

With more than 15 years of expertise in design, fabrication and installation, NIS is complete solution provider for aluminium doors and windows.

Using the industry's most advanced production machines, we design Aluminium windows which provides better sound insulation with great energy saving, Customer friendly and eco-friendly Products.

We work hard to enrich the lives of our customers by providing Customized windows and door solutions.

## OPAL SERIES

# CASEMENT DOORS & WINDOWS

The casement, we manufacture is based on inwards and outwards opening mechanism. The casement opens outwards and inwards with the help of outer sash frame.

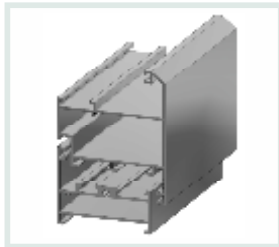

The requirement decides the designs and size because of the insulation and wind pressure. Its designs can vary according to the customers need i.e. top hung, side hung and fixed or as per common typologies. It comes in opal series 40.cw & 50.cw.

Casement window and doors have basically a mechanism that helps opening the window both outwards and inwards.

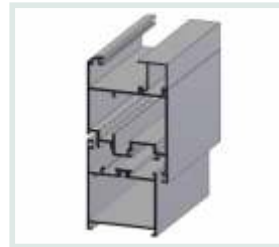

Casement windows and doors have this function due to the outer sash frame. According to the need of the customer's side hung, top hung and fixed windows are designed & Manufactured.

## OUR TYPOLOGIES

## OPAL SERIES

### SLIDING SYSTEM

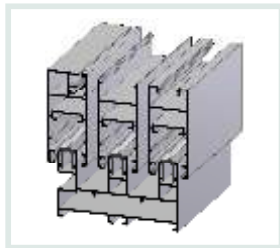

The sliding windows & doors are very easy to operate because of its ride over mechanism. The sliding window is made of two or more than two sashes that slide horizontally. It moves to the right or left directions. We manufacture according to your requirement depending on the insulation, designs, size and wind loads.

The sliding door also works as the same mechanism, the ride over mechanism like the slider window works. It can be moved right to the left and left to the right directions. Length and width can be increased with the addition of sashes.

Aluminium sliding doors are very durable that can be operated easily and comfortably. We manufacture sliding doors and windows of different colors and designs that suits to your needs and budget.

### OUR TYPOLOGIES

# SKY LIGHTS

## OS SG. 50 NI

We are specialized in designing and manufacturing skylights which are water proof secure and airtight.

We use different coating technologies on the glass to reduce these effects, including heat-retaining tints, protected coating and lowemissivity (low-e) coatings.

Skylight glazing is usually glass, although other glazing technologies may be used for solar heat control.

Depending on the performance you expect from a skylight, you may choose different types of glazing for different skylight locations throughout your home.

# FRAME LESS GLASS & ALUMINUM INTERNAL PARTITIONS

NIS provides internal partitions with and without frame for extra clarity and full view from inside and outside. We offer patch fitting frame less glass doors with SS H type and C type long Handles. Internal partitions with center opening / side opening & slim open able doors

This type of glass partition is generally used in building reception area / main entry, drawing rooms, living area, houses, shopping malls, shops etc.

# OPAL SERIES

## GLAZING SYSTEM

### OS SG. 50 NI

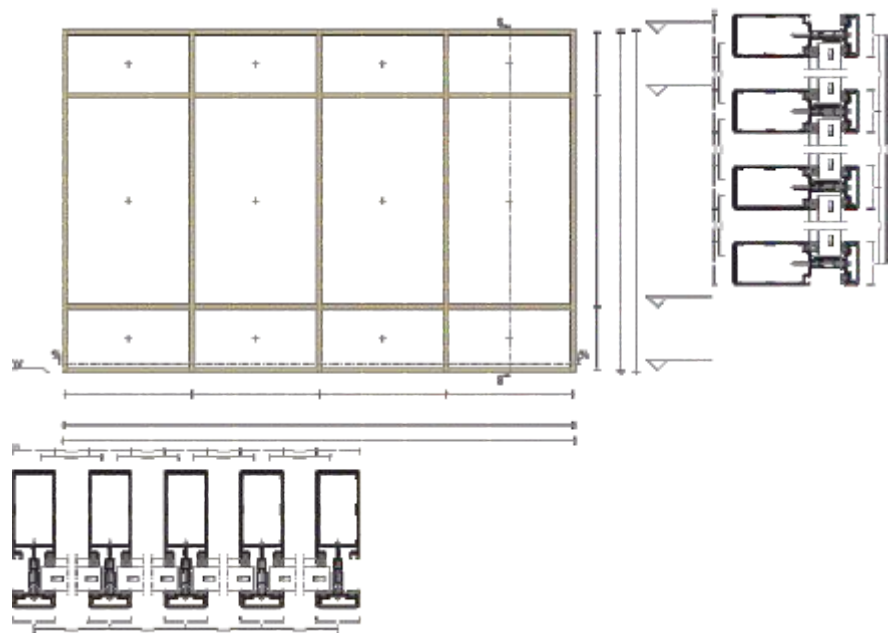

The structure glazing system for Facade is designed according to the requirement of wind load applicable on the structure for a particular location and the area of building built.

#### Structural Glazing Types

Capped curtain wall (Conventional Type)

Stick curtain wall System

# LOUVERS & SUNSHADING SYSTEM
